Saurav Chander Sharma

Data Analyst | SQL, Python, Power BI, Tableau, Excel, Snowflake, Google BigQuery, dbt, Dashboarding & Data Visualization | Helping Businesses Turn Data into Actionable Insights

Greater Toronto Area, Canada

Summary

I enjoy finding the story hidden inside data, understanding what happened, why it happened, and how that information can help a business decide what to do next.I am an early career Data Analyst with hands-on experience using SQL, Python, Power BI, Tableau, Excel, Google BigQuery, Snowflake, and dbt Core to transform complex data into clear, actionable business insights.My work has taken me across different areas of analytics, from analyzing 73,000+ bank branches to identify expansion opportunities, to evaluating payment performance and customer behavior for a fintech platform, to building an end-to-end ecommerce analytics pipeline using GA4 data, BigQuery, and dbt.Through these projects and my data analytics internship, I have developed practical experience in data cleaning, validation, transformation, exploratory data analysis (EDA), statistical analysis, data modeling, Star Schemas, ELT workflows, KPI development, dashboard development, performance reporting, trend analysis, customer segmentation, and data visualization. I have also worked with missing, duplicate, and inconsistent data to improve data quality and create reliable, reporting-ready datasets.For me, analytics is more than writing SQL queries or building dashboards. I enjoy understanding the business question behind the data, identifying what matters, and communicating findings in a way that supports better, data-driven decisions.I hold a Bachelor's in Computer Science and Engineering and a Postgraduate Certificate in Project Management, giving me a combination of technical knowledge and an understanding of business objectives, stakeholders, and project delivery.Before focusing my career on data analytics, I worked in fast-paced front-of-house environments and supported large-scale events, including the Toronto International Film Festival (TIFF). That experience strengthened my communication, teamwork, problem-solving, and ability to work effectively under pressure.I am continuing to grow my skills while pursuing opportunities in Data Analytics,

Business Intelligence, Reporting Analytics, Business/Data Analysis, Operations Analytics, Data Quality, and related analytical roles.I am always happy to connect with people working in data, analytics, and business intelligence.

Experience

Bharat Heavy Electricals Limited

Data Analyst

February 2022 - February 2022 (1 month)

India

Cleaned and validated COVID-19 datasets using SQL by identifying and resolving missing, duplicate, and inconsistent records to improve data quality

Wrote SQL queries to extract, filter, and transform healthcare data, preparing structured datasets for reporting and downstream analysis.

Performed data validation to ensure the accuracy and consistency of datasets used in web-based applications developed by the Digital Transformation Group (DTG).

Collaborated with team members to maintain reliable datasets that supported data-driven decision-making and digital initiatives.

Education

Algoma University

Postgraduate Certificate, Project Management · (2023 - 2025)

Galgotias University

Bachelor's degree, Computer Science · (2018 - 2022)

Hope Hall Foundation School

Senior Secondary , Science (Physics, Chemistry, Mathematics and Computer Science) · (2017 - 2018)
